

LEGEMDARY

LeGEMdary provides you with this easy, printable ring sizer. You have two options to determine the ring size:

IMPORTANT

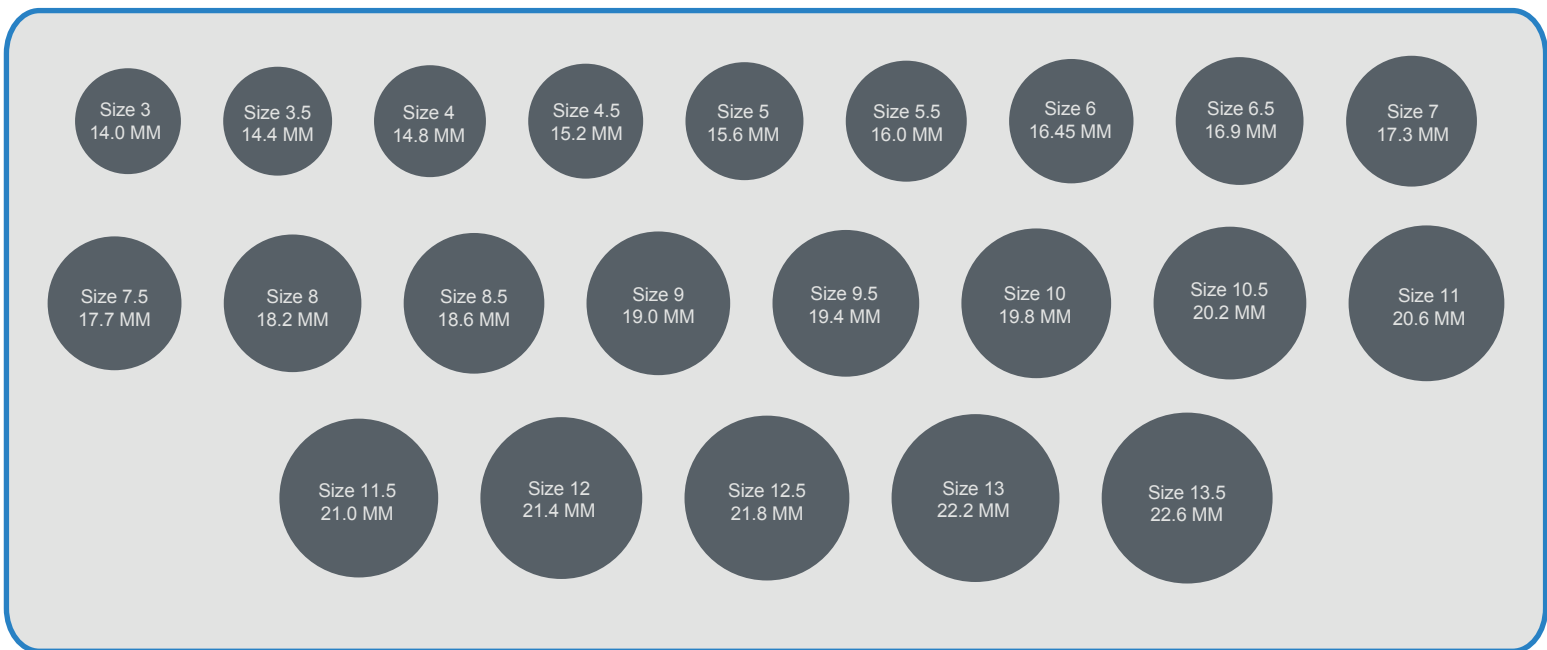

For an accurate fit, please read carefully:

Windows users: click on your printer icon. Make sure Page Scaling is set to "None" and the Auto-rotate and Center boxes are checked.

Mac users: in Setup, make sure Scale is set to 100% and "Scale to fit" is not checked. Page Orientation should be set to Portrait.

Option 1: The Ring Circle Method

Find a ring that she already owns and fits the finger your purchase is intended for appropriately. Place your ring inside one of the circle's below on your printout. Find the circle that exactly matches. The ring should fit perfectly inside the circle that is the correct size.

Option 2: The Paper Scale Method

Cut out the paper ring sizer below. Cut a slit at the line labeled "your size". Slide the pointed end of the sizer through the slit. Place your finger in the circle and pull the pointed size through until the sizer fits snug, but comfortably, on your finger. Read the number at your size.
